

THE ONLY WAY TO THE SOLUTION OF THE NATIONAL QUESTION IS:

SOLIDARITY:

For years now, the greekcypriot (g/c) and the turkishcypriot (t/c) ruling classes are “negotiating” in order to find a “solution” to the Cypriot national question.

However the only thing that they managed to achieve was to keep us divided, seed nationalism between us and disorient us.

Their conflicting nationalist interests have nothing to do with our needs.

To their nationalism we answer with solidarity, bicommunal and international struggle. The workers and the youth have nothing to divide. If it is left to them, they can easily find a solution which will solve the problems and unite the island.

WORKERS' STRUGGLE:

All these years the ruling classes are using the national question to call for “national” unity in each community.

However the recent attacks on our living standard show that their interests and our interests are not the same.

The t/c are now fighting to preserve their salaries, pensions, welfare and education. These are also the needs and demands of g/c workers.

Through common struggle, common unions and finally common political organisations we can plan and fight for a common land.

We can build a society that will be for the interests of the working class people and the youth, against nationalism and capitalist oppression.

SOCIALISM:

Capitalism has shown its limits through the current global economic crisis. It has also shown its limits in solving national questions. You cannot have capitalism without racism and nationalism!

We need a society for the needs of workers and youth, not a society for profit. We need, now more than ever, all the banks and main productive forces to be taken away from the hands of the few and pass into the hands of society, nationalised under the conditions of total transparency, workers' and society's control and management.

We need a democratic socialist society.

Join our struggle!
